

WHERE CAN WONDER TAKE YOUR STUDENTS?

Introducing Wonder Challenge -- a year long monthly STEM challenge and social media campaign to celebrate wonder in the world around us.

The **#WonderChallenge** program kicks off in tandem with the NC Science Festival as a way to get ready for the Science Olympiad National Tournament coming to North Carolina State University in May 2020. Each month will showcase a different partner with a unique STEM challenge.

We will feature great partners in NC communities and celebrate grassroots connections through schools, families and students. Participants will tag their challenge entries with the hashtag **#WonderChallenge** and post on social media for awesome wonder-filled prizes.
